SUDARSAN PIDUGU

Data Engineer | AWS | SQL | Python | PySpark

+91 8500843651 | sudarsanpidugu12@gmail.com

Preferred Work Locations: Bengaluru | Hyderabad | Chennai | Remote

Portfolio: https://sudarsanpidugu.github.io/

PROFESSIONAL SUMMARY

Detail-oriented **Data Engineer with around 4 years of professional experience** across technical and engineering roles. Skilled in **SQL, Python, PySpark, and AWS**, with knowledge of ETL processes, data transformation, data processing, and data validation. Familiar with working with structured datasets, writing SQL queries, and supporting data quality checks. Strong problem-solving and troubleshooting skills, with an interest in building reliable data pipelines and scalable cloud-based data solutions. Previously worked as a **DevOps Engineer at SRL Global**, with a focus on applying technical expertise to cloud technologies and data engineering.

TECHNICAL SKILLS

- **Programming:** Python
- **Database:** SQL
- **Big Data Technologies:** Apache Spark, PySpark
- **Cloud Platform:** Amazon Web Services (AWS)
- **AWS Services:** Amazon S3, AWS Glue
- **Data Engineering:** ETL Pipelines, Data Transformation, Data Validation
- **DevOps & Deployment:** DigitalOcean, Manual Application Deployment
- **Operating Systems:** Red Hat Linux, Windows
- **Development Environment:** Visual Studio Code (VS Code)
- **Remote Access Tools:** PuTTY, MobaXterm
- **Version Control:** Git, GitHub

PROFESSIONAL EXPERIENCE

Cafell Technology

Data Engineer | January 2026 – Present

Project: Healthcare Data Integration and ETL Pipeline

Domain: Healthcare

Technologies: Python, SQL, PySpark, Amazon S3, AWS Glue

Project Description:

- A healthcare data processing solution focused on integrating datasets from multiple source systems, transforming raw data into structured formats, and preparing reliable datasets for analytics and reporting.

Roles and Responsibilities:

- Work on data engineering requirements involving data ingestion, transformation, and processing.
- Develop and maintain ETL workflows to transform source data into structured datasets.
- Write SQL queries to extract, filter, join, and aggregate data.
- Use Python and PySpark for data cleansing, transformation, and processing.
- Organize raw and processed datasets in Amazon S3.
- Use AWS Glue for ETL processing and workflow execution.
- Perform data quality checks to identify duplicate records, missing values, and inconsistent data.
- Validate source and target datasets to check record counts and data consistency.
- Investigate data-processing failures and document transformation logic.
- Follow applicable data privacy and access-control requirements when handling healthcare data.

Visualpath

Data Engineer | October 2023 – January 2026

Project: E-Learning Platform Data Processing and Analytics

Domain: E-Learning

Project Description

- Worked in the context of an e-learning platform, supporting data-related activities associated with course information, enrollments, learner activity, and completion records.

Roles and Responsibilities

- Worked on data-related activities associated with an e-learning platform.
- Supported processing of learning-related datasets, such as course information, enrollments, learner activity, and completion records, where applicable.
- Used SQL to retrieve, filter, join, and aggregate data for reporting requirements, where applicable.
- Supported data cleansing, transformation, and validation activities.
- Assisted in identifying duplicate records, missing values, and inconsistent data.
- Prepared structured datasets for reporting and analytical use, where required.
- Supported investigation of data-processing issues and data-quality discrepancies.
- Collaborated with team members to understand requirements and resolve assigned technical issues.

SRL Global

DevOps Engineer | October 2022 – June 2023

Project: Client ETL Support and Server Monitoring

- Supported client-side ETL tasks and monitored existing data-processing workflows.
- Monitored server status and checked system activity in Linux environments.
- Used Linux command-line utilities to inspect files and investigate technical issues, where applicable.
- Assisted with identifying and reporting ETL execution failures and server-related issues.
- Used Git for source code version control and tracking changes.
- Coordinated with team members to investigate issues and support timely resolution.

- Followed established operational procedures for ETL tasks and server monitoring
-

Full Stack Developer (Freelancer)
Aug 2024 – Present

- Developed web applications and APIs based on client requirements.
- Worked with clients on features, enhancements, and application maintenance.

PROJECT EXPERIENCE

- **Bhageeratha Agri-Tech — Freelance Project**
  Status: Ongoing / Live
  Technologies: HTML, CSS, Bootstrap, JavaScript
  - Developed and maintain a responsive business website for Bhageeratha Agri-Tech.
  - Designed responsive and user-friendly web pages for desktop, tablet, and mobile devices.
  - Implemented product sections, enquiry/contact forms, navigation, and responsive UI components.
  - Maintain and update website content and features based on business requirements.
- **Min-hlsning (Freelance, US Client)**
  - Web application developed for US-based clients to support business growth.
  - Repo: GitHub – Min-hlsning
- **E-Commerce Platform (Narayana Tech House)**
  - Built e-commerce application for product stock and order tracking.
  - Tech: Python, Django, MySQL, HTML, CSS.
- **Self Projects**
  Data Analytics: Led **an** ETL operations project to consolidate data from multiple databases into a single data warehouse.
  - **Tech: Python, Pandas, NumPy, MySQL, Excel, Oracle, MSSQL**
  - **Repo: GitHub – Data-Analytics**
- **Student Management System:** Built a database management system with full CRUD operations to handle student records.
  - **Tech: Python, MySQL, Tkinter**

EDUCATION

BSc (Computers) – Dr. BR Ambedkar University, Hyderabad
Govt Degree College for Men (2018 – 2021)

PROFESSIONAL STRENGTHS

- Analytical and problem-solving skills
- Data quality and validation
- Technical troubleshooting
- Team collaboration and communication
- Documentation and attention to detail
- Continuous learning and improvement
